PRODUCT DISCONTINUANCE

FOREWORD

A PAS is a technical specification not fulfilling the requirements for a standard, but made available to the public and established in an organization operating under given procedures.

IEC-PAS 62167 was submitted by JEDEC and has been processed by IEC technical committee 47. Semiconductor devices.

The text of this PAS is based on the following document:

This PAS was approved for publication by the R-members of the committee concerned as indicated in the following document:

Draft PAS	\	Report	on voting	
47/1467/PAS	 , ((47)15	00/RVD	

Following publication of this PAS, the technical committee or subcommittee concerned will investigate the possibility of transforming the PAS into an international Standard.

An IEC-PAS licence of copyright and assignment of copyright has been signed by the IEC and JEDEC and is recorded at the Central Office.

- 1) The IEC (International Electrotechnical Commission) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of the IEC is to promote international cooperation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, the IEC publishes International Standards. Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. The IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of the IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested National Committees.
- 3) The documents produced have the form of recommendations for international use and are published in the form of standards, technical specifications, technical reports or guides and they are accepted by the National Committees in that sense.
- 4) In order to promote international unification, IEC National Committees undertake to apply IEC International Standards transparently to the maximum extent possible in their national and regional standards. Any divergence between the IEC Standard and the corresponding national or regional standard shall be clearly indicated in the latter.
- 5) The IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with one of its standards.
- 6) Attention is drawn to the possibility that some of the elements of this PAS may be the subject of patent rights. The IEC shall not be held responsible for identifying any or all such patent rights.

PRODUCT DISCONTINUANCE

(From JEDEC Council Ballot JCB-95-13A, formulated under the cognizance of JC-14.4 Committee on Quality Systems Standardization.)

1 Purpose

This standard establishes the requirements for timely customer notification of planned product discontinuance, which will assist customers in managing end-of-life supply, or to transition ongoing requirements to substitute products.

2 Scope

This standard is applicable to supplier and affected customers of electronic components.

3 Definitions

Affected Customer: A customer who has purchased product from the supplier or an approved agent during the preceding two years.

Approved Supplier Agent: A direct sales channel or an authorized distributor.

Approved Customer Agent: A direct procurement channel, a contract manufacturer, or a purchasing agent.

Multiple-Source Product: A device (including package, temperature, grade, etc.) that is manufactured by more than one independent supplier.

Planned Product Discontinuance: Product obsolescence that is planned and controlled by a supplier in the normal course of a product life cycle.

Single-Source Product: A device (including package, temperature, grade, etc.) that is manufactured by only one supplier.

4 Requirements

4.1 Timing

The supplier shall provide notice of planned product discontinuance's to their direct affected customer(s) and approved supplier agents, allowing a minimum of 6 months for multiple-source product and 12 months for single-source products, for customers to place final purchase orders. The approved supplier agents shall, where applicable, notify their affected customers of the planned product discontinuance.

4.2 Format

The product discontinuance notice shall be sent, in writing or electronically, to the approved customer agent.

4.3 Contents

The product discontinuance notice shall include as a minimum: (a) the effective date for last purchase orders, and (b) the affected supplier part numbers and customer part numbers, if available.

4.4 Product delivery

Final purchase order products shall be delivered commensurate with the supplier's production capacity.

4.5 Alternative source

The supplier shall, upon request, provide reasonable information or technical data to help customers locate an alternative source.

4.6 Other options

Upon customer request, the supplier should consider other feasible options, such as the sale or transfer of technology and tooling, and the establishment of wafer or die banks to support ongoing requirements.
