Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 7 to ISO 7010:2003 was prepared by Technical Committee ISO/TC 145, *Graphical symbols*, Subcommittee SC 2, *Safety identification, signs, shapes, symbols and colours*.

Graphical symbols — Safety colours and safety signs — Safety signs used in workplaces and public areas

AMENDMENT 7

IMPORTANT — The colours represented in the electronic file of this document can be neither viewed on screen nor printed as true representations. For the purposes of colour matching, see ISO 3864-1 which provides colorimetric and photometric properties together with, as a guideline, references from colour order systems.

Add the following safety signs:

- P025: Do not use this incomplete scaffold
- P026: Do not use this device in a bathtub, shower or water-filled reservoir
- P027: Do not use this lift for people
- P028: Do not wear gloves

Safety sign P025: Do not use this incomplete scaffold

	Reference No. ISO 7010-P025
	Referent Do not use this incomplete scaffold
	Function To prohibit the use of scaffolding systems which are not complete
	Image content Human figure (right-hand profile) walking on a broken horizontal bar surrounded by vertical and horizontal lines
Hazard Incomplete scaffold Human behaviour that is intended to be caused after understanding the safety sign's meaning Not using an incomplete scaffold Related referents – Additional information Test data obtained according to ISO 9186-1:2007 are available from more than one country. Findings from testing showed that the safety sign did not reach the criteria of acceptability. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.	

Safety sign P026: Do not use this device in a bathtub, shower or water-filled reservoir

	Reference No. ISO 7010-P026
	Referent Do not use this device in a bathtub, shower or water-filled reservoir
	Function To prohibit the use of unsuitable electrical equipment in or near water
	Image content Shower and bathtub
Hazard Electric shock Human behaviour that is intended to be caused after understanding the safety sign's meaning Not using electrically powered equipment in bathtubs, showers or water-filled reservoirs Related referents — Additional information Test data obtained according to ISO 9186-1:2007 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.	

Safety sign P027: Do not use this lift for people

	Reference No. ISO 7010-P027
	Referent Do not use this lift for people
	Function To prohibit the use of the lift for the transportation of people
	Image content Human figure (front view) in a rectangle, short arrows above and underneath the rectangle
Hazard Goods or freight lifts without the safety features necessary for the transportation of people Human behaviour that is intended to be caused after understanding the safety sign's meaning Not using the lift for the transportation of people Related referents ISO 7010-P020 Additional information Test data obtained according to ISO 9186-1:2007 are not available. Consequently, a supplementary text sign shall be used to increase comprehension except when the safety sign is supplemented by manuals, instructions or training.
