

AERONAUTICAL MATERIAL SPECIFICATION

Society of Automotive Engineers, Inc.
29 West 39th Street
New York City

AMS 5362 B

Issued 12-1-47

Revised 12-1-50

STEEL CASTINGS, PRECISION INVESTMENT, CORROSION AND HEAT RESISTANT 19Cr - 12Ni - (Cb+Ta)

1. ACKNOWLEDGMENT: A vendor shall mention this specification number and its revision letter in all quotations and when acknowledging purchase orders.

2. APPLICATION: Small parts, such as exhaust couplings, stator vanes, and turbine nozzle vanes, and where welding during fabrication may be required, for use at temperatures up to 1500 F, but useful at that temperature only when stresses are low.

3. COMPOSITION: Castings shall conform to the following:

Carbon	0.12 max
Manganese	2.00 max
Silicon	1.00 max
Phosphorus	0.04 max
Sulfur	0.03 max
Chromium	18.00 - 19.50
Nickel	10.00 - 14.00
Columbium + Tantalum	10xC - 1.50
Molybdenum	0.50 max
Copper	0.50 max

4. CASTING: Castings shall be poured either from remelted master heat metal or directly from a master heat. A master heat is previously refined metal of a single furnace charge. Gates, sprues, risers, and rejected castings shall only be used in preparation of master heats but shall not be remelted directly, without refining, for pouring of castings.

5. CONDITION: Solution heat treated, unless otherwise specified.

6. TECHNICAL REQUIREMENTS:

6.1 Hardness: Castings shall have hardness not higher than Brinell 175 or equivalent.

6.2 Embrittlement: Material shall be capable of meeting the following test:

6.2.1 Test specimens, after being heated at 1200 F for 2 hr and air cooled, shall withstand immersion for 48 hr in a boiling aqueous solution containing 100g of $\text{CuSO}_4 \cdot 5\text{H}_2\text{O}$ and 100 ml of H_2SO_4 (sp gr 1.84) per liter of solution under a reflux condenser, without evidence of intercrystalline surface attack.

7. QUALITY:

7.1 Castings shall be uniform in quality and condition, sound, and free from foreign materials and from internal and external defects detrimental to fabrication or to performance of parts. Castings shall have smooth surfaces and shall be well cleaned. Unless otherwise specified, metallic shot or grit shall not be used for final cleaning.

SAE of the SAE Technical Board provides that: "All technical reports, including standards, are advisory only. Their use by anyone engaged in industry or trade is entirely voluntary. There is no agreement to adhere to SAE standard or recommended practice, and no commitment to conform to or be guided by any technical report. In formulating and approving technical reports, the Board and its Committees will not investigate or consider patents which may apply to the subject matter. Prospective users of the report are responsible for protecting themselves against liability for infringement of patents."
