

# AEROSPACE MATERIAL SPECIFICATION

AMS-T-81914/1

Issued

JUN 1999

Tubing, Plastic, Flexible, Convoluted,  
Polytetrafluoroethylene, Standard Convolutions

FSC 9330

## NOTICE

This document has been taken directly from U.S. Military Specification MIL-T-81914/1(AS) and contains only minor editorial and format changes required to bring it into conformance with the publishing requirements of SAE technical standards. The initial release of this document is intended to replace MIL-T-81914/1(AS). Any part numbers established by the original specification remain unchanged.

The original Military Specification was adopted as an SAE standard under the provisions of the SAE Technical Standards Board (TSB) Rules and Regulations (TSB 001) pertaining to accelerated adoption of government specifications and standards. TSB rules provide for (a) the publication of portions of unrevised government specifications and standards without consensus voting at the SAE Committee level, and (b) the use of the existing government specification or standard format.

Under Department of Defense policies and procedures, any qualification requirements and associated qualified products lists are mandatory for DOD contracts. Any requirement relating to qualified products lists (QPL's) has not been adopted by SAE and is not part of this SAE technical document.

SAE Technical Standards Board Rules provide that: "This report is published by SAE to advance the state of technical and engineering sciences. The use of this report is entirely voluntary, and its applicability and suitability for any particular use, including any patent infringement arising therefrom, is the sole responsibility of the user."

SAE reviews each technical report at least every five years at which time it may be reaffirmed, revised, or cancelled. SAE invites your written comments and suggestions.

The complete requirements for procuring the tubing described herein shall consist of this document and the issue in effect of MIL-T-81914(AS).

#### REQUIREMENTS:

Convolution type: Helical (See 3.3)

Construction details: Construction details, including available sizes, dimensions and tolerances are located in Table I. Lengths shall be as specified by the procuring activity.

Continuous operating temperature: -67°C (-88°F) to +260°C (500°F)

Color: Unless otherwise specified, the supplied color shall be black.

Physical properties: General physical requirement values along with associated test conditions are located in Table II.

Part number: Consists of the basic number of this specification sheet and dash numbers as shown below:

Standard convolution Polytetrafluoroethylene, standard wall, 0.500 inch is identified as: M81914/1-1106.

TABLE I  
CONSTRUCTION DETAILS

Identifier	Max. Inside Dia.	Min. Inside Dia.	Max. Outer Dia.	Wall Thickness Max.	Convolutions Per inch $\pm 1$	Weight (Lbs) Per 100 feet Max.	Min. Bend Radius
**01	.188	.181	.320	.023	8	2.0	.500
**02	.281	.273	.414	.027	7 1/2	2.9	.750
**03	.312	.303	.450	.027	7 1/2	3.6	.875
**04	.375	.364	.530	.029	7	4.2	1.000
**05	.437	.425	.590	.029	7	4.9	1.250
**06	.500	.485	.660	.029	7	5.2	1.500
**07	.625	.608	.780	.035	7	6.9	1.750
**08	.750	.730	.975	.035	6	10.4	1.875
**09	.875	.850	1.100	.035	6	11.3	2.250
**10	1.000	.975	1.260	.035	4 1/2	12.6	2.500
**11	1.125	1.105	1.390	.035	4 1/2	13.8	2.750
**12	1.250	1.210	1.539	.035	4	15.5	3.000
**13	1.500	1.440	1.850	.040	4	21.7	3.750
**14	1.750	1.690	2.100	.045	4	25.3	4.250
**15	2.000	1.940	2.350	.045	4	29.0	4.750

\*\* - the asterisks shall be replaced with convolution type and class designation.

Note: Unless otherwise specified all dimensions are in inches.

TABLE II  
PHYSICAL PROPERTIES

PROPERTY	REQUIREMENT	TEST PARAGRAPH
Construction details	In accordance with Table I	4.6.1
Stress in psi, at 10% strain	250 to 900	4.6.2
Specific gravity, max.	2.20	4.6.3
Crush resistance, pounds, horizontal min.	10	4.6.4
